

Skyview Heights Facilities

The facilities are the Pool, Tennis Court, Children's' Playground, and the Clubhouse.

The **Pool** was completely rebuilt during the Fall and Spring of 2017-2018. The old chlorinated pool was replaced with a **heated** saltwater system. The wading pool for young children was also rebuilt, and by State regulation had to be enclosed with a separate fence. An easy access to the children's Playground from the Pool was built into the fence. The separate storage sheds were removed and replaced with a Pavilion which has storage for pool furniture in the enclosed rear of the structure; and overhead fans in the open, but covered front apron of the structure. New pool furniture was also purchased. Not seen by most residents is the underwater pool lighting – provided free by the builder. We'll have to arrange for a few night openings during the summer so everyone can see this – it's spectacular.

The **Tennis Court** was resurfaced during the summer of 2018, and doubles as a basketball court.

The **Children's' Playground** was re-mulched and cleaned up during the summer of 2018, and has access from the parking lot, and also from the Pool area.

The **Clubhouse** is planned to be renovated during the Fall/Spring of 2018-2019.
